

OLD HALL SURGERY

Opt-out from secondary use of patient identifiable data

Please could you add the relevant “electronic flags” (*read codes 9Nu0 and 9Nu4*) to my/our medical records, in order to ensure:

- that personal confidential information is not uploaded from the GP records to the Health and Social Care Information Centre (HSCIC) via the General Practice Extraction Service (GPES) or other means
- that personal confidential information gathered from *any* health and social care setting is prevented from leaving the HSCIC

I understand the implications of this request:

- that it will not affect the medical care that I receive either from the GP surgery or from anywhere within the NHS or the private sector
- that this refusal does not in any way prohibit the GP surgery from sharing my medical information with other NHS and private services, where necessary, to provide effective clinical care
- that I can change our mind at any time about this refusal
- that I will inform you if we subsequently decide to opt back into this system
